Register of Probate

NOTICE OF FILING WITH THE FEDERAL ENERGY REGULATORY COMMISSION GREEN LAKE WATER POWER COMPANY. GREEN LAKE HYDRO-ELECTRIC PROJECT FERC NO. 7189

Green Lake Water Power Company, as required by the Federal Energy Regulatory Commission (FERC or Commission), hereby gives notice of its intent to seek the relicensing of the Green Lake Project, FERC No. 7189. The Project is a hydroelectric generating facility, located on Green Lake and Reeds Brook near the City of Ellsworth in Hancock County, Maine. The Applicant's address is 120 Hatchery Way, Ellsworth, Maine 04605; phone number is 207-667-3322

On or about March 31st, 2019. Green Lake Water Power Company will file with the FERC its Notification of Intent (NOI) to seek a new license, a Pre-Application Document (PAD), and a request for Authorization to Use the Traditional Licensing Process (TLP) under Part 4 of the Commission's Regulations for the Project. The NOI provides notice of Green Lake Water Power Company's intent to file a license application for the Project. The PAD summarizes relevant and available information regarding the Project's description and operation along with discussions of the potential operational effects on environmental and cultural resources.

Green Lake Water Power Company invites resource agencies, Indian tribes, and members of the public who have an interest in the proceedings to participate in the licensing and to comment on this notice and related matters. The PAD and NOI and

associated reference materials are available for inspection and reproduction on line at http://www.ferc.gov/docs-filings/elibrary.asp. They are also available for inspection by appointment at Green Lake Water Power Company, 120 Hatchery Way, Ellsworth, Maine 04605

Green Lake Water Power Company's request to use the TLP is based on the project being small and uncomplicated with moderate study needs. Green Lake Water Power Company believes that granting the request to use the TLP will not infringe on the ability for agencies or the public to provide comments on the project, nor on Green Lake Water Power Company's ability to address such comments.

Comments on the request to use the TLP are due to the Commission no later than 30 days following the filing date or not later than April 30th, 2019. All responses must reference the Green Lake FERC project number (FERC No. 7189). Comments should address, as appropriate to the circumstances of the request, the (A) likelihood of timely license issuance; (B) complexity of the resource issues; (C) level of anticipated controversy; (D) relative cost of the traditional process compared to the integrated process; (E) the amount of available information and potential for significant disputes over studies; and (F) other factors the commenter believes pertinent. Commenters must submit an electronic filing via FERC's website (http:// www.ferc.gov/docs-filing/ferconline.asp) pursuant to 18 CFR§ 385.2003(c) or an original and eight copies of their comments to the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.
