***Green Lake Hydroelectric Project FERC No. 7189-014
Draft License Application***

Dear Secretary Bose,

In accordance with 18 CFR § 5.16(c), the Licensee for the Green Lake Hydroelectric Project, Green Lake Water Power Company (GLWP or Licensee), respectfully submits the Draft License Application (DLA) for filing with the Federal Energy Regulatory Commission (FERC). The DLA is being filed in accordance with the Integrated Licensing Process (ILP) and consists of draft technical exhibits and a draft environmental analysis.

As outlined in 18 CFR § 5.18, the DLA discusses GLWP's proposal for continued operation of the Green Lake Project. GLWP's proposal is to continue the existing operation of the Project. GLWP is not proposing the addition of any turbine-generator units at the Project as part of this relicensing.

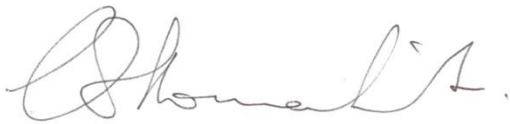

Exhibit E discusses the results of the studies completed to date in support of the relicensing and considers how the information and data collected during those studies addresses issues that were raised by agencies and other relicensing participants.

In accordance with FERC regulations (18 CFR § 5.16(e)), participants and Commission staff may submit comments to GLWP regarding the DLA within 90 days following this filing, i.e. by January 30, 2022. Any participant whose comments request new information, studies, or other amendments to the approved Study Plan must include a demonstration of extraordinary circumstances, pursuant to the requirements of 18 CFR § 5.15(f).

Kimberly D. Bose, Secretary
Green Lake Project DLA
