**Green Lake Hydroelectric Project FERC No. 7189-015**  
**GLWP is Filing Amended FLA Exhibit A and Exhibit E**

Dear Secretary Bose,

On March 31, 2022, Green Lake Water Power Corporation (GLWP) filed a Final License Application for the relicensing of the Green Lake Hydroelectric Project, FERC No. 7189 (Project).

GLWP has amended the FLA Exhibit A and Exhibit E due to additional research that has been done and to correct inaccuracies that have been discovered in the submissions on file.

The main changes to the FLA are the following:

- 1) Statements of the current license terms have been corrected to reflect an order amending the original license issued May 25, 1984.
- 2) A proposal has been added to change the fall drawdown restrictions in the new license so they reflect the latest and best information available on Arctic charr in Green Lake.
- 3) New information on various fish habitats in Green Lake has been documented.
- 4) Reeds Brook is documented as being an intermittent stream.

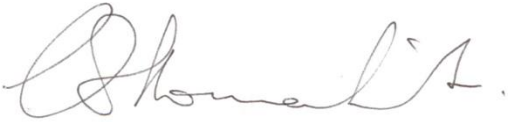

Each of the amended files is being submitted with an additional 'change file' that shows the changes within the file. Numerous minor spelling and grammatical errors have also been fixed in the files in this submission – these corrections are not noted in the 'change files'.

Kimberly D. Bose, Secretary  
Green Lake Project Amended FLA Exhibits

Page 2

A copy of the order amending the Green Lake Project license dated May 25, 1984, is included with this submission. The amended license is on file with FERC, but it is not easily accessible as it is on microfiche. Also included are the 1981 DOI memo and the 2024 MDIFW email that are referenced in the Exhibits.

If you have any questions regarding this filing, please contact me by email at [caroline@greenlakewaterpower.com](mailto:caroline@greenlakewaterpower.com) or by phone at (207) 667-3322

Sincerely,

Caroline Kleinschmidt  
Relicensing Coordinator  
Green Lake Water Power Co.
